5 WAYS SOLAR CAN SAVE YOU MONEY!

Introduction:

Are You Against Saving Money?

If your answer is “No,” then this ebook is for you! Every homeowner dreams of reducing their monthly expenses, but high electricity bills often feel like a never-ending burden.

Whether you own a home with a pool, have two floors to cool, work from home, or manage a household as a stay-at-home parent, solar energy can be the solution you’ve been looking for. Let’s dive into the top five ways solar can save you money and bring long-term peace of mind.

5 WAYS SOLAR CAN SAVE YOU MONEY!

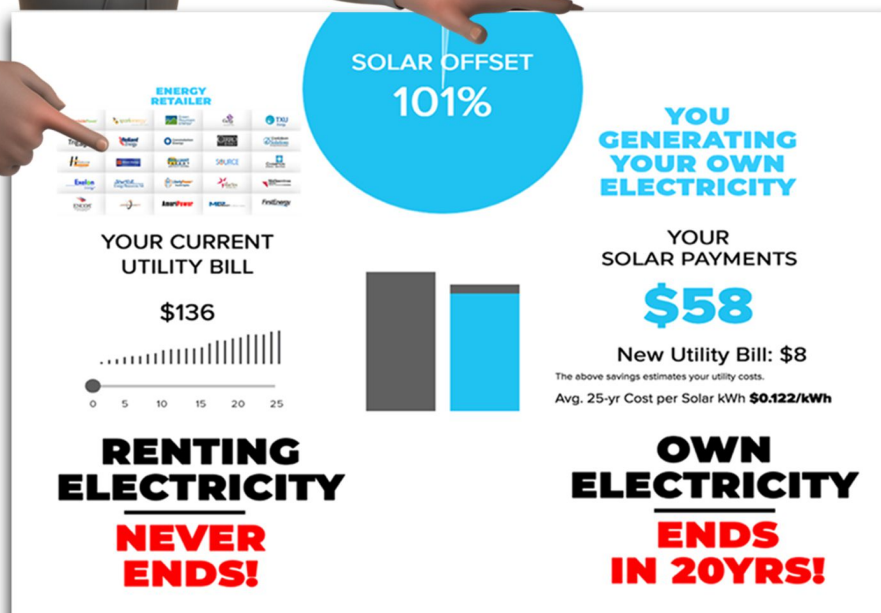

FIRST WAY

1. Slash Your Monthly Electricity Bills

Fear: Rising energy costs are unpredictable and often leave homeowners with no control over their finances.

Solution: Solar panels allow you to produce your own energy, reducing or even eliminating your electricity bills.

Bonus Tip: Homes with higher energy consumption, like those with pools or multiple levels, stand to save the most because solar offsets higher usage.

SECOND WAY

2. Take Advantage of Tax Credits and Incentives

Fear: The upfront cost of installing solar feels intimidating.

Solution: Federal tax credits, state rebates, and utility incentives significantly reduce installation costs. In 2024, homeowners can receive up to 30% of their solar installation cost back in tax credits.

\$0 Down - No Money Upfront!
Your monthly charge is based on your homes energy usage

What Does the Federal Solar Tax Credit Cover?

- Solar Panels Cost
- Solar Equipment Cost
- Labor Cost
- Cost of Solar Battery Storage
- Sales Taxes for Qualified Solar install Costs

5 WAYS SOLAR CAN SAVE YOU MONEY!

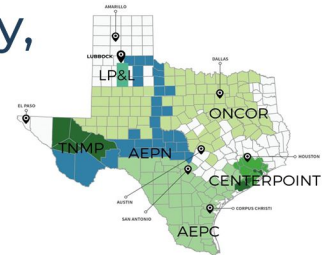

THIRD WAY

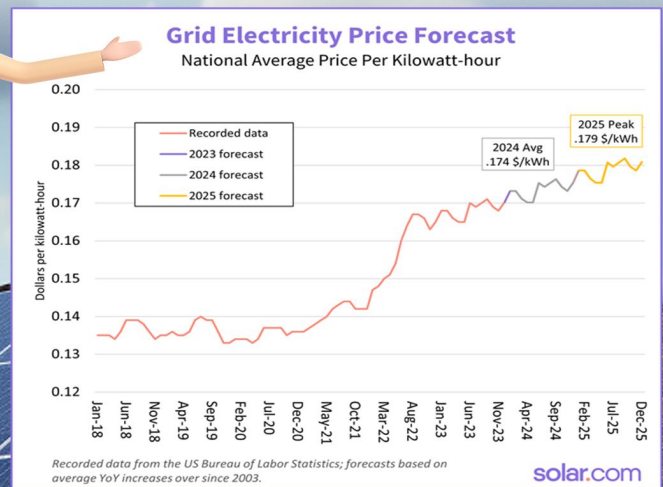

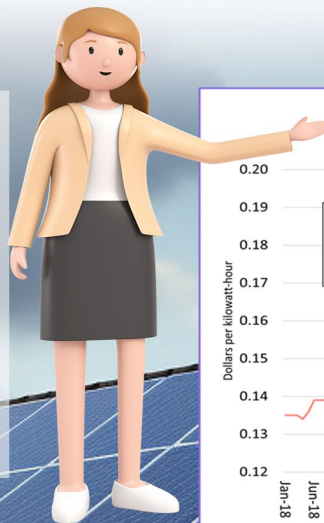

3. Protect Yourself from Rising Utility Rates

Fear: Energy companies increase rates yearly, and homeowners are stuck paying more for the same usage.

Solution: With solar, you lock in a fixed cost for your energy, providing budget predictability. No more surprise spikes in your utility bill!

According to current forecasts, Texas is likely to see a moderate increase in energy rates in 2025, with the primary driver being growing electricity demand due to factors like data center expansion, coupled with potential fluctuations based on weather events and grid capacity limitations; this could translate to an average residential rate increase of around 3-5% compared to 2024, with the possibility of spikes during peak demand hours.

Recorded data from the US Bureau of Labor Statistics; forecasts based on average YoY increases over since 2003.

4. Increase Your Home's Resale Value

Fear: Homeowners worry about making investments that won't pay off in the long run.

Solution: Solar panels increase property value by an average of 4%. Homes with solar are more attractive to eco-conscious buyers who also want to save money.

FIFTH WAY

5. Earn Money from Your Energy Production

Fear: Extra energy produced by solar goes to waste.

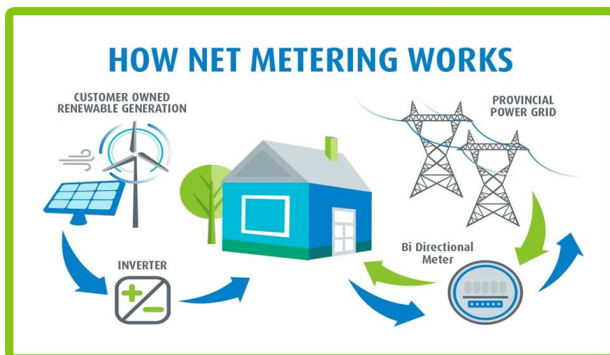

Solution: Many utility companies offer net metering programs where they pay you for the excess energy your system produces.

Your investment can generate income while you sleep!

Net Metering:

A Game-Changer for Reducing Electricity Bills & Going Negative

5 WAYS SOLAR CAN SAVE YOU MONEY!

Solar Is Perfect For You!

Why Solar is Perfect for Homes with Specific Needs

Homes with Pools:

Pools are energy hogs, running filtration and heating systems daily. Solar offsets these costs, letting you enjoy your pool guilt-free.

Two-Story Homes:

Cooling a larger home with air conditioning can skyrocket your bills. Solar ensures your comfort without financial stress.

Work-at-Home Professionals:

More hours at home mean higher energy usage for lights, electronics, and appliances. Solar keeps your home office running efficiently.

Stay-at-Home Parents:

Running a household during the day uses energy for cooking, cleaning, and entertainment. Solar helps you focus on your family, not your bills.

5 WAYS SOLAR CAN SAVE YOU MONEY!

**Share solar
with the world
and earn!**

Who do you know who could benefit from clean, renewable energy?

Spread the word in your community and make money while doing it!

You'll get **\$1,000** every time you refer a homeowner who goes solar. They'll save money on energy costs, you'll earn some cash, and the planet gets a little greener. That's what you call a Win. Win. WIN!

How It Works:

- 1** Sign up for free.
- 2** Have a conversation with a homeowner about the benefits of solar, and grab a copy of their electric bill.
- 3** Share the electric bill with Powur via a personalized online platform and Powur will do the rest!
- 4** Get paid \$1,000 when the system is installed.

It's that easy! Refer more people to solar and Powur will take it from there — and you'll take money to the bank.
